CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
SAN FRANCISCO BAY REGION

ORDER NO. R2-2004-0065

AMENDMENT OF SITE CLEANUP REQUIREMENTS (ORDER NO. 95-224) FOR:

SHELDON OIL COMPANY

for the property located at

526 SCHOOL STREET  
SUISUN CITY  
SOLANO COUNTY

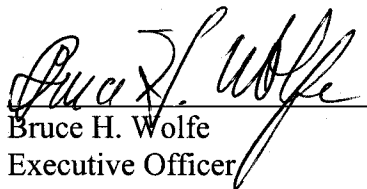

The California Regional Water Quality Control Board, San Francisco Bay Region (hereinafter the Board), finds that:

1. **Board Order:** The Board adopted site cleanup requirements for this site on November 16, 1995 (Order No. 95-224).
2. **Reason for Amendment:** Tasks 3 through 6 of the Order require completion of a remedial investigation (Task 3), preparation of an interim remedial action workplan (Task 4), completion of interim remedial actions (Task 5), and preparation of proposed final remedial actions and cleanup standards (Task 6). Tasks 4 and 5 are non-date certain; however, the compliance dates for Tasks 3 and 6 have passed, and it is necessary to set new compliance dates. The delay has not allowed significant migration of pollutants; however, recent monitoring results indicate trichloroethylene is present in shallow groundwater at 3,800 micrograms per liter. This concentration slightly exceeds screening levels for risk to indoor air, and potential risk to occupants of the adjacent apartments located at 501 Main Street must be evaluated. Further delineation is required to determine if remediation is needed.
3. **CEQA:** This action is an amendment of an order to enforce the laws and regulations administered by the Board. As such, this action is categorically exempt from the provisions of the California Environmental Quality Act (CEQA) pursuant to Section 15321 of the Resources Agency Guidelines.
4. **Notification:** The Board has notified the discharger and all interested agencies and persons of its intent under California Water Code Section 13304 to amend site cleanup

requirements for the discharge, and has provided them with an opportunity to submit their written comments.

**IT IS HEREBY ORDERED**, pursuant to Section 13304 of the California Water Code, that Order No. 95-224 shall be amended as follows:

- A. The compliance date for Task 3 shall be November 1, 2004.
- B. The compliance date for Task 6 shall be August 1, 2005.

Chlorine residual is a Group II pollutant  
The chlorine residual instantaneous  
serious violation

Dear Mr. Quilici,

Enclosed is Complaint No. R2-2003-0103. The Complaint alleges that during the period between April 1, 2003, and June 30, 2003, ConocoPhillips had one serious violation of its effluent discharge limits. The reported value of 1.6 mg/L for June 29, 2003 exceeds the chlorine residual instantaneous maximum limit of 0.0 mg/L by 20% or more. This violation is subject to a \$3,000 MMP.

I plan to bring this matter to the Water Board at its June 16, 2004, meeting. You have three options:

1. You can appeal the matter by May 15, 2004. If the appeal is denied, you may be liable for the MMP or, refer the matter to the Board for a penalty.

2. You can waive the MMP by checking the first box. There will be no hearing on this matter, provided no significant comment is received by Board staff during the comment period. By checking the second box, you agree to pay the liability within 30 days after the waiver becomes effective.

3. You can meet with the Board to contest the matter. Written comments from the Board may: impose an administrative penalty; decline to seek civil liability; or have a Superior Court consider imposition of a civil penalty.

4. You can sign the attached waiver form and check the second box on this matter, provided no significant comment is received by Board staff during the comment period. By checking the second box, you agree to pay the liability within 30 days after the waiver becomes effective.

5. The San Francisco Bay Area's waters for over 50 years have been protected by the Regional Water Quality Control Board.

Mr. Dennis Quilici
